CS348 + CS378: Overview & Course Logistics

Bhaskaran Raman

Department of CSE, IIT Bombay

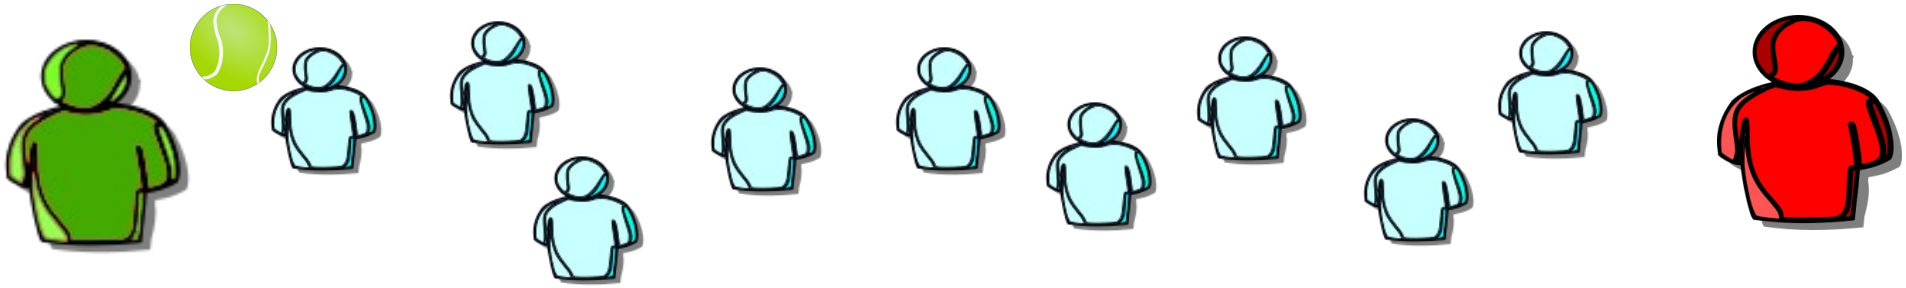

https://www.cse.iitb.ac.in/~br

Child's Play

- Rules:
  - Cannot use mouth to talk
  - Cannot write
  - Cannot leave physical spot
  - Cannot use mobile phone/laptop
  - Cannot take another person's help

Pass the Ball

- Rules:
  - No throwing, pass by hand
  - Odd roll number to even, even to odd

The flipped classroom model

- View online lecture videos: https://robin.bodhi.cse.iitb.ac.in
- Attempt in-video problems *before* corresponding tutorial: mandatory
- Deadline to view videos and attempt problems: Sunday prior to the week
  - Viewing schedule will be available online
- Tutorial attendance is **compulsory**

Tutorials

- Class divided into 3 batches
- Each batch attends one tutorial per week (except first week)
- SAFE quiz at the beginning of each tutorial
- During quiz-week:
  - All 3 batches will attend quiz on same day
  - This is in addition to regular tutorials during that week

Course Contents

- Goals & metrics, the 7 network layers
- Physical layer: encoding
- Link layer: Framing and error control, Ethernet switching, MAC protocols, WiFi
- Network layer: IP addresses and formatting, routing protocols, supporting protocols
- Transport layer: UDP, TCP
- Application layer: WWW, Email, DNS

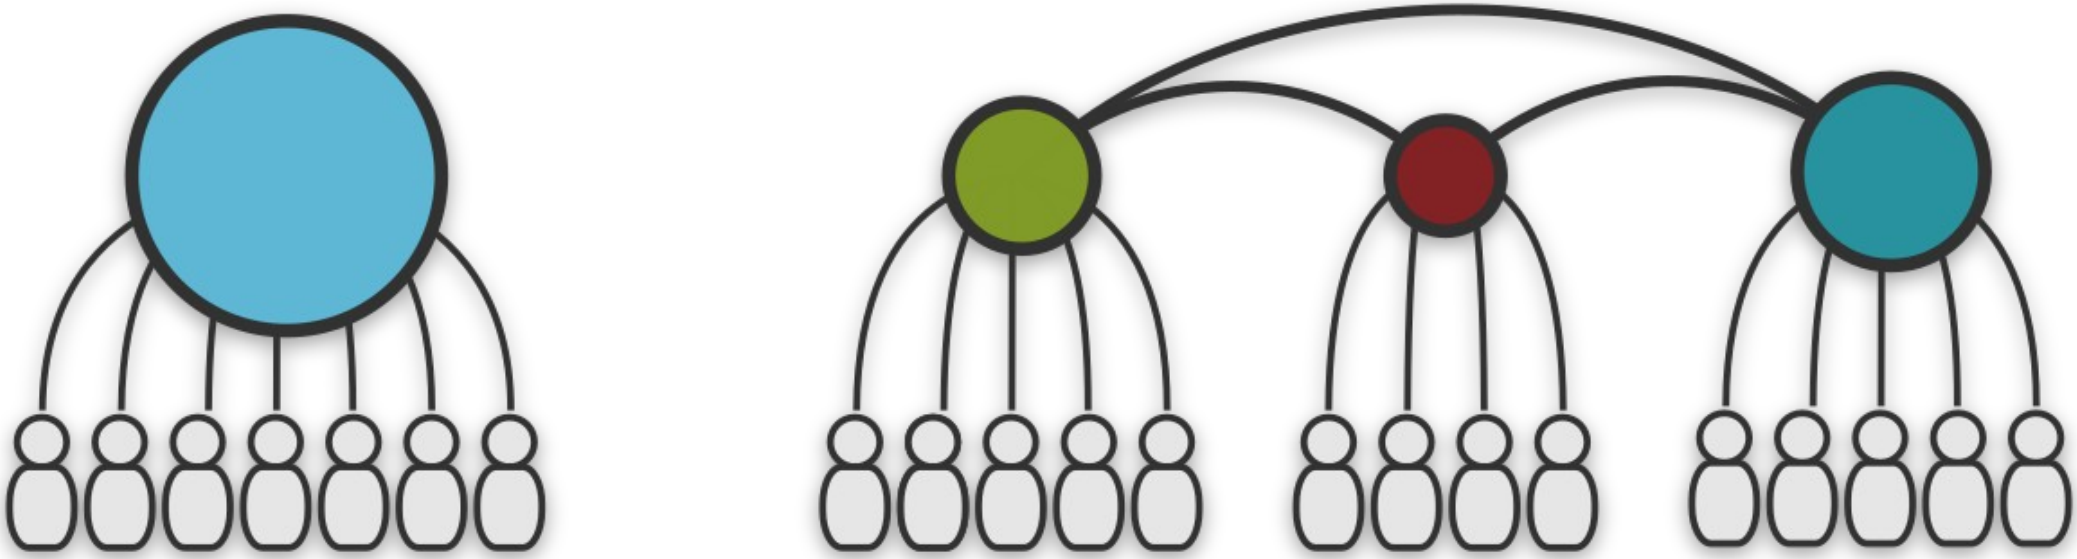

Evaluation Plan

- Quizzes to keep you on top of things
  - SAFE quizzes: every class/tutorial, 15%
  - 30-45min quizzes: (best 3 of 4) x 5% = 15%
- MidSem: 30%, EndSem: 40%
- Mandatory attendance: all 3 classes in traditional classroom weeks, your batch in flipped weeks
  - **Overall attendance < 75% ==> DX**
- Integrity: most important, strict policy on dishonesty
  - **Cheating OR helping cheat ==> FR grade, DAC**

CS378: Companion Lab Course

- Trace analysis
- Network simulator
- Socket programming
- Linux network sysad-giri
- Lab evaluation:
  - 40% in-lab evaluation, 30% midsem, 30% endsem
  - Mandatory attendance: < 75% ==> DX
  - All labs MUST be done from lab venue, not remote

Enter the World of Communication Networks

Picture of the Internet, from the Internet

But Remember...

- We are in the age of misinformation – human vulnerability to be brainwashed is exploited much more than ever
- “... humans are not wired to be constantly wired” – Cal Newport in Digital Minimalism
- *You* should control (your usage of) the network, do not let the *network* control you
